Amazon.com, Inc. or its affiliates After following the instructions in the user manual for starting the appliance, make sure that your electrical socket is working by plugging another appliance. If it still does not work, do not try to dismantle or repair the appliance yourself. Instead, take it to an approved repair centre After following the instructions in the user manual for starting the appliance, make sure that your electrical socket is working by plugging another appliance. If it still does not work, do not try to dismantle or repair the appliance yourself. Instead, take it to an approved repair centre 11EN6C - REGULAR OR BOLD ■ This feature allows you to make a coffee that is more or less full-bodied. ■ The BOLD feature increases the time of the cycle for a stronger coffee. ■ Press the REGULAR or BOLD button to select the intensity of your coffee. Fig. 19. ■ The REG or BOLD icon appears on screen. This feature is stored in the memory for subsequent cycles. 6D - 4 CUPS ■ To activate this feature, press the 1-4 button (n) before starting the cycle. Fig. 20. ■ This feature is especially designed for making strong amounts of coffee, i.e. between 2 and 4 cups. It makes it easier to extract optimal aromatic flavor. 6E - KEEP WARM TIME ■ By default, keep warm will be active during the cycle. To deactivate it, press Time (o) and turn the BREW/control knob (k) to set the keep warm duration. The keep warm function must be set in 15 minutes intervals. Fig. 21 and 22. ■ Confirm by pressing the BREW/control knob (k). The duration is confirmed automatically after approximately 5 seconds. Fig. 22. ■ KEEP WARM will appear on the screen and the duration is confirmed. ■ To cancel the keep warm function, press Time (o) and KEEP WARM will disappear from the screen. ■ You can change the keep warm duration while it is in operation by turning the BREW/control knob (k). ■ To program 3 temperature levels to keep your coffee warm: LOW, MEDIUM or HIGH ■ Press the TEMP button (t) and turn the BREW/control knob (k) to select the temperature level. Fig. 23 and 24. ■ Set by pushing the BREW/control knob (k) or by default, validation is done automatically after about 5 seconds. ■ To dispose of used ground coffee, remove the filter and the filter holder of the coffee maker. Fig. 25a-band 26a-b. ■ Do not clean the appliance if it is still hot. ■ Wash the carafe, the removable filter holder and the permanent filter with warm, soapy water. You may place the carafe in the dishwasher. CAUTION: Do not place the carafe in the microwave. Do not put other parts of the coffee maker into the dishwasher. ■ Clean the coffee maker with a damp cloth or sponge. Never use abrasive or strong products on any part of the coffee maker. ■ To clean the stainless steel parts of your coffee maker, dampen a soft cloth or sponge with warm water. Wipe carefully with a dry cloth. ■ For difficult stains, use a cloth with white vinegar. ■ Do not immerse the appliance in water or under the tap. 7. CLEANING Body of the appliance a. b Lid c Water tank d Water level indicator e Carafe lid f Carafe handle g Carafe h Warming plate i Filter holder j Permanent gold tone filter k BREW/control knob l CLOCK button m The coffee maker on a hard flat surface. ■ Connect the power cord to a 120V wall socket. 1 - When you connect the coffee maker for the first time, "1:00 pm" displays and flashes on screen. Fig. 1. Program the time by turning the BREW/control knob (k) to the right to increase, to the left to decrease. Confirm by pressing the CLOCK button (l) or the BREW/control knob (k). The time is displayed. Note: Your clock is now programmed and will continue to display the time even when your appliance is on standby. If the appliance is disconnected or there is a power failure, the clock will return to 1:00 PM. The steps above must be repeated to program the clock again. ■ Remove stickers from your coffee maker. ■ Before first use, run your coffee maker without coffee to flush the circuit. Fill the water tank up to the maximum level and begin a cycle by pressing the BREW/control knob (k). IMPORTANT: Your appliance was designed to operate only with cold or room temperature water. ■ Open the lid of the coffee maker (b). Fig. 4. ■ Fill the carafe (g) with cold or room temperature water. Pour the water in the water tank (c) Fig. 5. The water level indicator displays the number of cups. Do not exceed 12 cups. Fig. 6. ■ Place the carafe (g) with its lid on the warming plate (h) making sure that it is properly placed to trigger the mechanism that will allow the coffee to flow. Fig. 7. ■ It is best to remove the filter holder with the filter before adding the ground coffee. If ground coffee has accidentally been poured into the water tank, please do not run the cycle; instead clean the water tank. The ground coffee could plug the water circuit. ■ Add 1 KRUPS (v) spoonful of ground coffee per cup. Do not exceed 12 spoons (2 ounces). Fig. 10. ■ Make sure the filter holder (i) is inserted. Fig. 8. Place the permanent filter (j) in the filter holder (i) Fig. 9a or a No. 4 paper filter Fig. 9b. If you use a paper filter, be sure it is fully open and properly positioned in the filter holder. ■ REGULAR/ BOLD button n 1-4 CUPS button o CLEAN button p AUTO ON button q TURBO button r Filter cartridge holder s Filter cartridge t Keep Warm TEMP Button u Keep Warm TIME button v Spoon w Replacement indicator of the filter cartridge x Aroma tube y
